

## MIRARCO Showcases Ontario Investment Properties

Ontario's newest investment properties will be exhibited in a 3D Virtual Reality (VR) venue at this year's PDAC 2008 conference. The portable exhibition will provide a forum for eight junior mining companies to give investors and the public a look deep underground, highlighting the potential for minerals in these mines. The VR Investor Forum will be located at the PDAC Investors Exchange, and will provide an opportunity to get an insider's look at these investment properties.

### Interesting Mining Fact: FYI

Over 17,000 people attended the PDAC trade show in 2007, and this year with their new location they expect even more people! Are you going?

### ParaviewGeo Beta Launch: Free Your Data!

During PDAC 2008, MIRARCO will be launching what is expected to be the next big thing in the world of geology and 3D modelling. ParaviewGeo is an open source software developed by MIRARCO for the integration and visualization of large, complex data sets. The simplicity and ease of use makes ParaviewGeo the perfect tool to build integrated models from multiple data sources and software packages.

For more on how this exciting new tool can enhance the return on investment of your next technical project, contact Andrew Dasys ([adasys@objectivity.ca](mailto:adasys@objectivity.ca)).

### Lighter Side of MIRARCO

Why did the prospector throw away his ore samples?

...He took them for Granite!

### MIRARCO offers M.O.R.E.

On Wednesday, March 5th at PDAC, MIRARCO will host "The M.O.R.E. Event". This exciting and enlightening session will provide tools to improve productivity and reduce risk in a competitive marketplace:

- Money** - Learn how to leverage your current investments through strategic tax strategies and innovative subsidy programs.
- Opportunities** - Discover new partnerships and projects offered through provincial and national initiatives.
- Resources** - Unlock your team's potential with new optimization tools and technology.
- Expertise** - Tap into human resources to help fast forward your innovative ideas and gain a competitive advantage.

The highlight of the session will be a keynote addressed by Dr. William Schroeder, President, Kitware. He has revolutionized the medical industry with the use of the free, open source software Paraview, and will be demonstrating the potential for this software in the mining and prospecting fields.

RSVP early as seating is limited. Visit <http://more.mirarco.org> to see the full schedule and to register.
