ABOUT THE HOSTS

The 13th Mine Ventilation Symposium is co-hosted by MIRARCO of Laurentian University in partnership with CANMET-MMSL.

MIRARCO Mining Innovation

MIRARCO Mining Innovation delivers quality research and innovative solutions to the global mining industry. MIRARCO's mission is to develop the people and tools needed to plan and design the underground mines and related facilities of the future, with expertise in geomechanics (hazard assessment and risk mitigation); engineering / exploration visualization & optimization; and environmental stewardship & sustainability. Through MIRARCO, partners have the added benefit of accessing customized applied research teams; testing, analytical and visualization facilities; and funding subsidy programs and tax credits. MIRARCO is located on the campus of Laurentian University in Sudbury, Ontario, Canada. As part of Laurentian University, MIRARCO offers hands-on research experiences through Laurentian's premier Mining Engineering Programs.

To learn more about MIRARCO, please visit www.mirarco.org.

CANMET-MMSL

CANMET Mining and Mineral Sciences Laboratories (MMSL) is a network of federal government research laboratories within Natural Resources Canada (NRCan). NRCan's Mine Air Quality and Ventilation group also has a facility located in Sudbury.

CANMET-MMSL provides quality research and sound scientific advice to the mining and minerals industries, and to provincial/territorial and federal government departments involved in promoting or regulating these industries. It conducts research and development (R&D) on a wide range of processes and technologies involved in extracting ore from the ground and transforming it into a concentrate, mineral product or metal. CANMET-MMSL also has a long-standing international reputation for technical excellence in mining and mineral processing and is a recognized leader in developing technological solutions to reduce environmental liabilities and to improve mine workers' health and safety.
